

Manchester Airport

Taxiway Alpha Echo

Client:
Galliford Try & MAG

Duration:
Feb 2018 - Apr 2018

Suppliers:
Titan Plant Hire LTD

Scope: Installation of 7700m² of 730mm thick type of FH dry lean concrete including 2 no. AGL duct crossing.

Details:

Gill Civil Engineering Limited (GCEL) was appointed to undertake the rehabilitation of Taxiway Alpha Echo at Manchester Airport by Galliford Try. GCEL installed a total of 7700m² of dry lean concrete in layers on the taxiway.

All concrete installed was tested in accordance with DIO specification 051. The work carried out during the project was on day shifts in an air-side working environment.

Date of completion: April 2018
