

Scope: Installation of 1900m of BBS concrete barrier with base slab, 4 no. Bifurcation, 2 no. Transitions

Details:

GCEL were appointed to install 1900m of BBS approved standard profile concrete barrier, 4 no. bifurcations and 2 no. transitions to central reserve on the M5 Motorway junction 22 - 23. The project necessitated a high level of planning and implementation to manage winter weather conditions, working around structures, working on live carriageway and meeting key dates to ensure all carriageways are open in time for Christmas. GCEL team was proud to have completed this challenging project on time, within budget and to the client's satisfaction.
