

Scope: Supply and lay of 16,000 m² of Pavement Quality Concrete and installation of 375m of Slot Drains

Details:

Gill Civil Engineering (GCEL) worked with Costain Limited to deliver a new park and ride facility at M5 J23 for Hinkley Point Power Plant. Works involved placement of mesh, installation of 200mm thick concrete slab with slot drain and 10 access chambers.

GCEL worked with our in house concrete supplier (Britannia Onsite Concrete) to set up an on site concrete batching facility using volumetric trucks, to ensure concrete supply requirements were met. The project was a success and completed within the required time scale.

Hinkley Point Park and Ride

Client:
Costain LTD & EDF
Energy

Duration:
April 2017 - July 2017

Supplier:
Titan Plant Hire LTD
Britannia Onsite (BOS)
Concrete LTD
